

**Supplemental Figure S2.** Measurement of chlorophyll content index (CCI, SPAD Units) in AM- (CTRL) and AM+ (*R. intraradices* and *F. mosseae*) tomatoes under well-watered (NS) and water stress (WS) conditions. Lower case letters above bars indicate significant differences attested by Tukey's HSD test ( $P < 0.05$ ). Data are expressed as mean  $\pm$  SE ( $n = 5$ ).
